Professional statement

About me:

My name is "Sriraj Malla" undergrad student with degree in computer science and engineering specialization in networking and security. Interested in cybersecurity seeking career in an organization that offers the opportunity to learn and grow. I am totally enthusiastic, self-motivated, and hard-working displaying a positive attitude to every challenge. I would be excited to work with the best of my interest and intent for the development of the organization and mine.

List three-to-five strengths that you currently have or are committed to developing

1. Python programming

2. Java programming language

3. MySQL

4. Bash Scripting

5. Strong written and verbal communication

List one to two values you have

1. Protecting organizations

2. Protecting customers/people

3. Adhering to law

Ask yourself some clarifying questions to determine what to include in your professional

statement:

1. **What am I most passionate about in the field of cybersecurity?**

   As the use of internet is increasing in this digital era which also increasing number of threats to privacy and security so I want to help the organization and my country to help mitigate threats from foreign countries as cyberattacks is new way to start wars I want to stop these threats is given chance

2. **Who is the audience for my professional statement (e.g., cybersecurity recruiters, specific organizations, government employers, etc.)?**

   Recruiters from multinational companies is where I am looking forward to work in as they need best cybersecurity professionals to maintain privacy and security in organization
